## HUAWEI FusionSolar Residential: Leading innovation, helping families enjoy 100% green power

**“Optimizer + Inverter + ESS + Charger + Load + Grid + SmartPVMS” One-fits-all Solution**

From green power generation to intelligent power consumption, leading home energy management

# Residential Smart PV Solution:

## Leading in PV Power Generation to Intelligent Power Consumption

\*The SUN5000 inverter and MERC optimizer only available in EU in 2024

# Residential Smart PV Solution Smart String Energy Storage System

LUNA2000-7/14/21-S1

Your reliable power bank

**NOTE**

S0 and S1 cannot be used together in the same network.

**Technical Specification**

LUNA2000-5-S0

LUNA2000-10-S0

LUNA2000-15-S0

Performance

Power module	LUNA2000-5KW-C0		
Number of power modules	1		
Battery module	LUNA2000-5-E0		
Battery module capacity	5 kWh		
Number of battery modules	1	2	3
Battery usable capacity <sup>1</sup>	5 kWh	10 kWh	15 kWh
Max. output power	2.5 kW	5 kW	5 kW

**Technical Specification**

LUNA2000-7-S1

LUNA2000-14-S1

LUNA2000-21-S1

Performance

Power module	LUNA2000-10KW-C1		
Number of power modules	1		
Battery module	LUNA2000-7-E1		
Battery module capacity	6.9 kWh		
Number of battery modules	1	2	3
Battery usable energy <sup>1</sup>	6.9 kWh	13.8 kWh	20.7 kWh
Max. charging & discharging power	3.5 kW	7 kW	10.5 kW

**S1: industry's flagship, 8 major upgrades**

**Usable energy** **+27%** per kWh

**Capacity** 5 kWh/30 kWh -> **6.9 kWh/82.8 kWh**

**Warranty** Max 10 years-> **Max 15 years**

**Noise** **Nature cooling, 29 dB**

**All new look** Perfect balance of high performance and **artistic design**

**Charge/discharge power** Max 5kW-> **Max 10.5kW**

**Installation experience** **Cable-free between modules**

**Safety** New safety features: **active pressure relief and fire prevention technology, 40cm water immersion protection**

## Smart Capsule Interface

Battery Control  
Unit Health

Battery Health

S1 is operating

Average Battery SOC (%)

# Cable-free connection, saving installation time by **50%+**

## Time-saving: No communications cable or power cable

Between power packs and battery packs

Between battery packs

## Labor-saving: Convenient docking

3-layer orientation design for easy docking

## Free from worry: Intelligent ports detection

Sensor inside, identifies faults through temperature detection intelligently

① Enclosure orientation  
(Slope design)

② Nesting orientation  
(metal material to protect  
terminals)

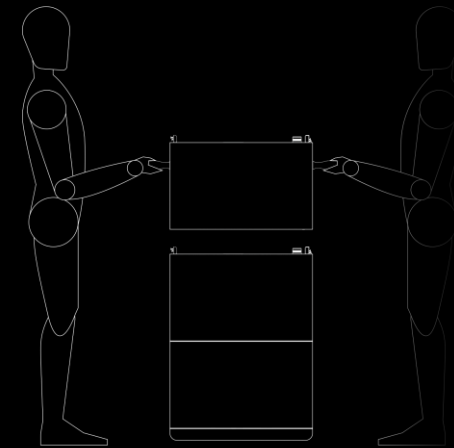

③ Ports orientation  
(floating design for easy alignment)

Sensor  
inside

## Ergonomic Carrying Handles

We looked for the best possible way to carry our battery expansion modules, making the installation more enjoyable and respectful of human factors and ergonomics

# Architectural Look & Feel

Minimalism and elegance, to blend into people's home.

## Industry-leading IP66 residential ESS

	LUNA S1	Vendor B	Vendor P	Vendor S
Ingress Protection Rating	IP66	IP55	IP55	IP55

Easily cope with **rain** and **water splashes**

## Industry-leading water immersion protection residential ESS

**40cm**

**72h**

Safe in case of **waterlogging, ice, and snow coverage**

\*The LUNA S1 is a non-professional waterproof device, pls. keep it away from water sources during

High-strength chassis

Resistance to **5T** heavy pressure

Accidental bumping in the garage

Impact during moving objects

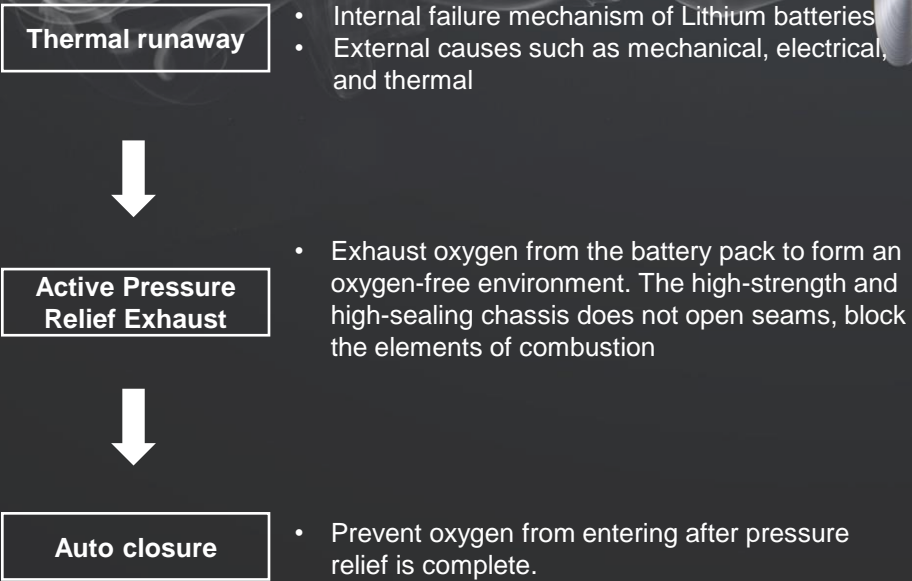

\*Severe impact affects the stability of the ESS. Avoid impact whenever possible.

# Active pressure release technology, preventing combustion from basic logic

	LUNA S1	Vendor B	Vendor P	Vendor S
Emergency protection	<b>Dual-protection mechanism</b>	NA	NA	NA

Principle: Active pressure relief exhaust, reducing oxygen concentration and eliminating combustion aids

Three elements of combustion:  
combustible, ignition source, and combustion aid (oxygen)

Emergency fire suppression,  
an extra protection for families

### Emergency Fire Suppression Module

### Working Principles

Step 1: Start at a high temperature ( $190\pm 15^{\circ}\text{C}$ ).

Step 2: The fire extinguishing package releases the cleaning extinguishing agent

- A large amount of gas produced quickly
- The extinguishing agent is pushed to erupt from the module in a pulse mode, instantly producing a large amount of gas to blow out the flame
- The eruption gas can absorb the free radicals and realize the chemical suppression of the flame

# SUN2000-MB0: Possibility to connect to 4 battery units, now also Checkwatt compatible!

**3 + 12** max  
 Inverters LUNA-S1  
 (SUN2000-12~25K-MB0)

**1GWh**  
 Throughput in 15 years

## Inverters support ESS capacity expansion

For LC0, M1, MAP0 inverters:

LUNA2000-7/14/21-S1

**Max. two S1**  
**41.4kWh**

For MB0 inverter:

LUNA2000-7/14/21-S1

**Max. four S1**  
**82.8kWh**

UPPDATERAD  
2024-09-27

### CHECKWATT CM10 KOMPATIBILITET

HÄRDVARA, KOMPATIBEL FÖR STYRNING MED CHECKWATT CM10

# All-round upgraded three-phase inverter, better experience

## Three-phase Asymmetric Inverter

SUN5000-8/12K-MAPO **New**

SUN2000-5/6/8/10/12K-MAPO **New**

### Higher MPPT Capability

16 A, 2 MPPT

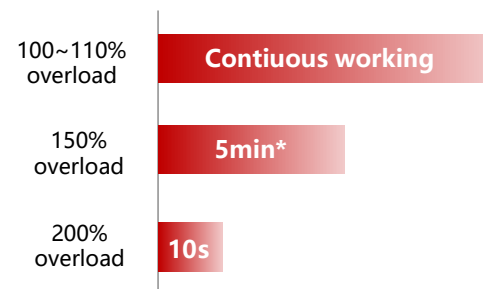

**Asymmetric Output**

Supported

**ESS Awake By Grid**

Supported

### Superb Off-grid Adaptability

Note: 5min for 150% overload only apply for single-phase, 1min for 3-phase

### Battery Ready, Scale Smoothly

max. 2 LUNA S0

**30 kWh** For S0

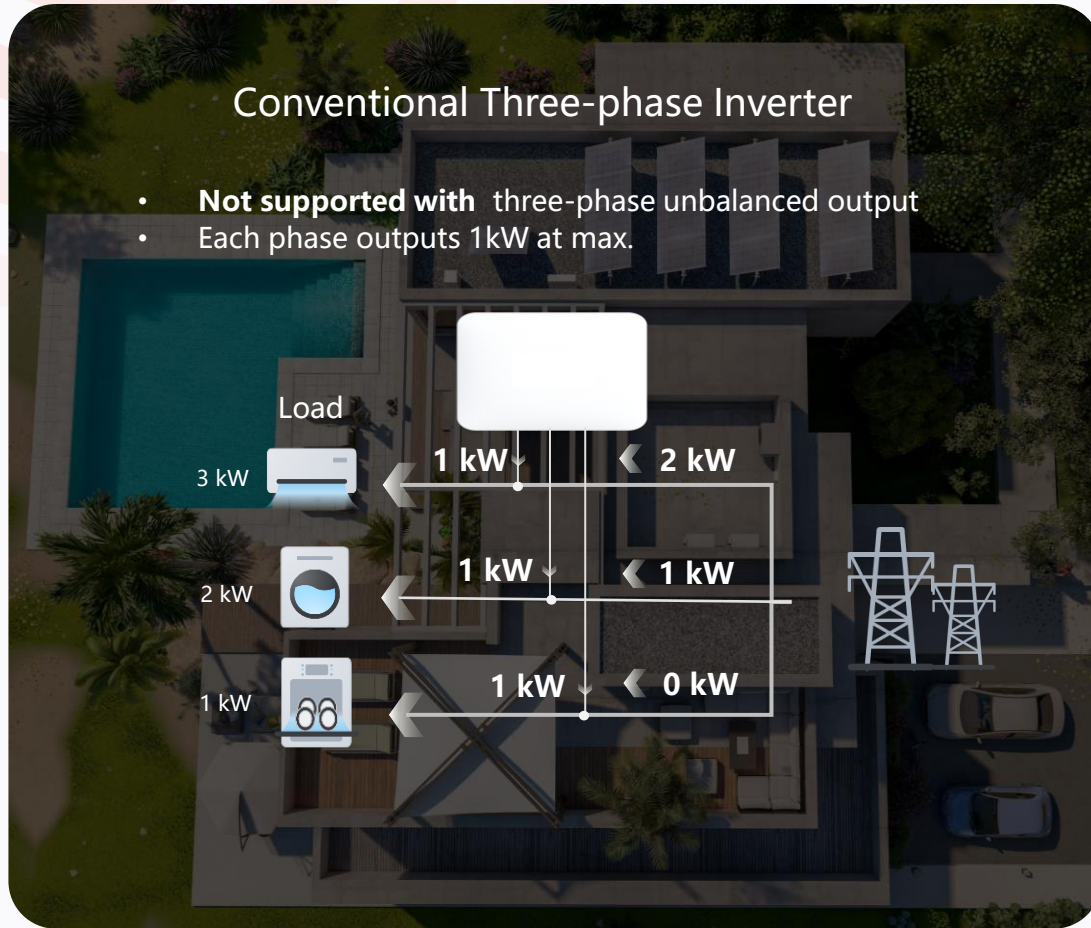

**OR**

max. 2 LUNA S1

**41.4 kWh** For S1

# Three-phase Asymmetric for 50% Higher self-consumption Rate

Result: Still need purchase 3kW from Grid, leading to a revenue loss

Result: Improving 50%+ self-sufficiency rate of PV+ESS system

# More Reliable Backup, More Power Choices

## Whole Home Backup

SmartGuard-63A-T0/AUT0

New

### Reliable Backup Power

max. **36kW**

Three-phase off-grid backup power for MAP0

#### Bypass Mode

When a fault occurs,  
manual bypass is supported

#### Seamless Switchover

Continuously working  
as if no power outage

### More Loads Backup Supported

Hierarchical shutdown for longer backup time

On-grid

Off-grid

SOC < 50%

- **MAP0 supports three-phase loads backup**
- M1/MB0 only support single-phase loads backup

# Smart Scheduling: Utilize the Big Data and Algorithm for Optimum Revenue of PV&ESS

## Challenge: Fixed scheduling cannot maximize benefits.

Currently, the fixed ESS scheduling policies (Maximum self-consumption and TOU) cannot handle the real-time changes.

### Floating electricity price

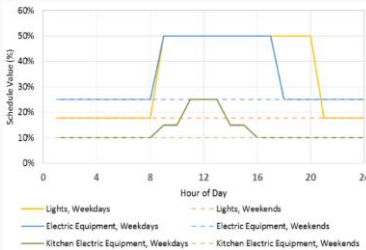

Electricity price varies greatly with external factors such as fuel price, season and market.

### Changing weather

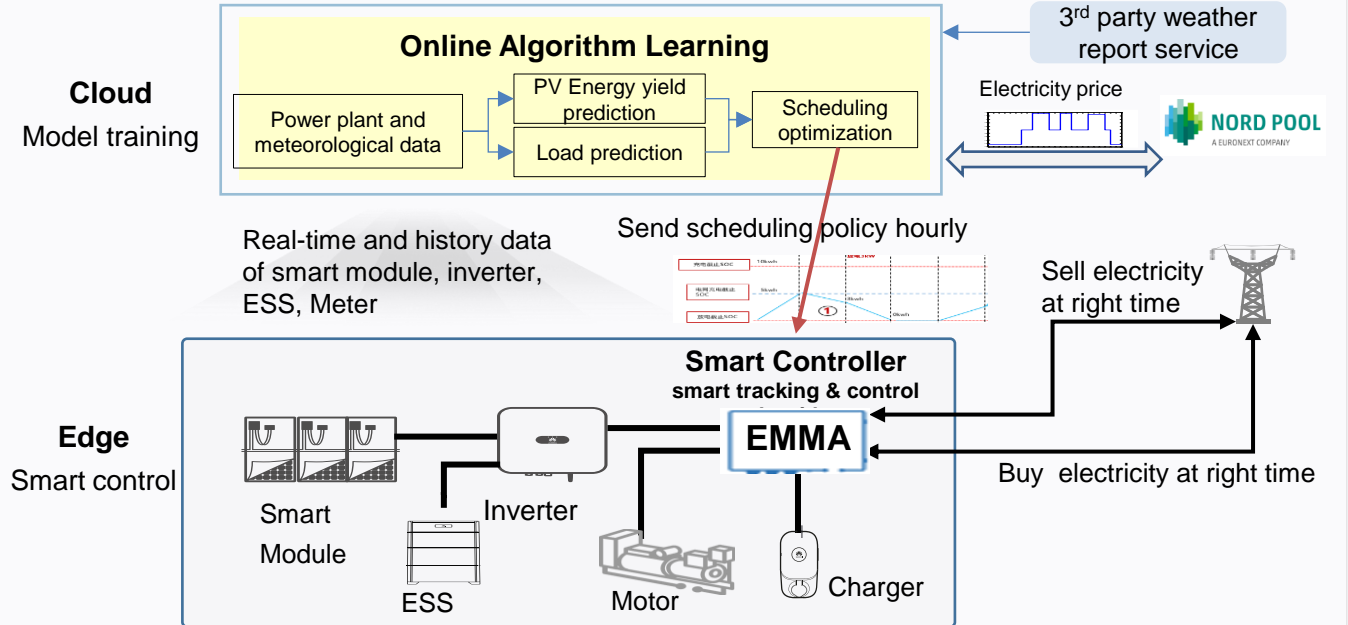

The PV energy yield is uncertain due to weather factors, and the fixed scheduling policy cannot change every day

### Variable load

The load curve varies greatly between weekdays and weekends, and fixed scheduling is difficult to cope with

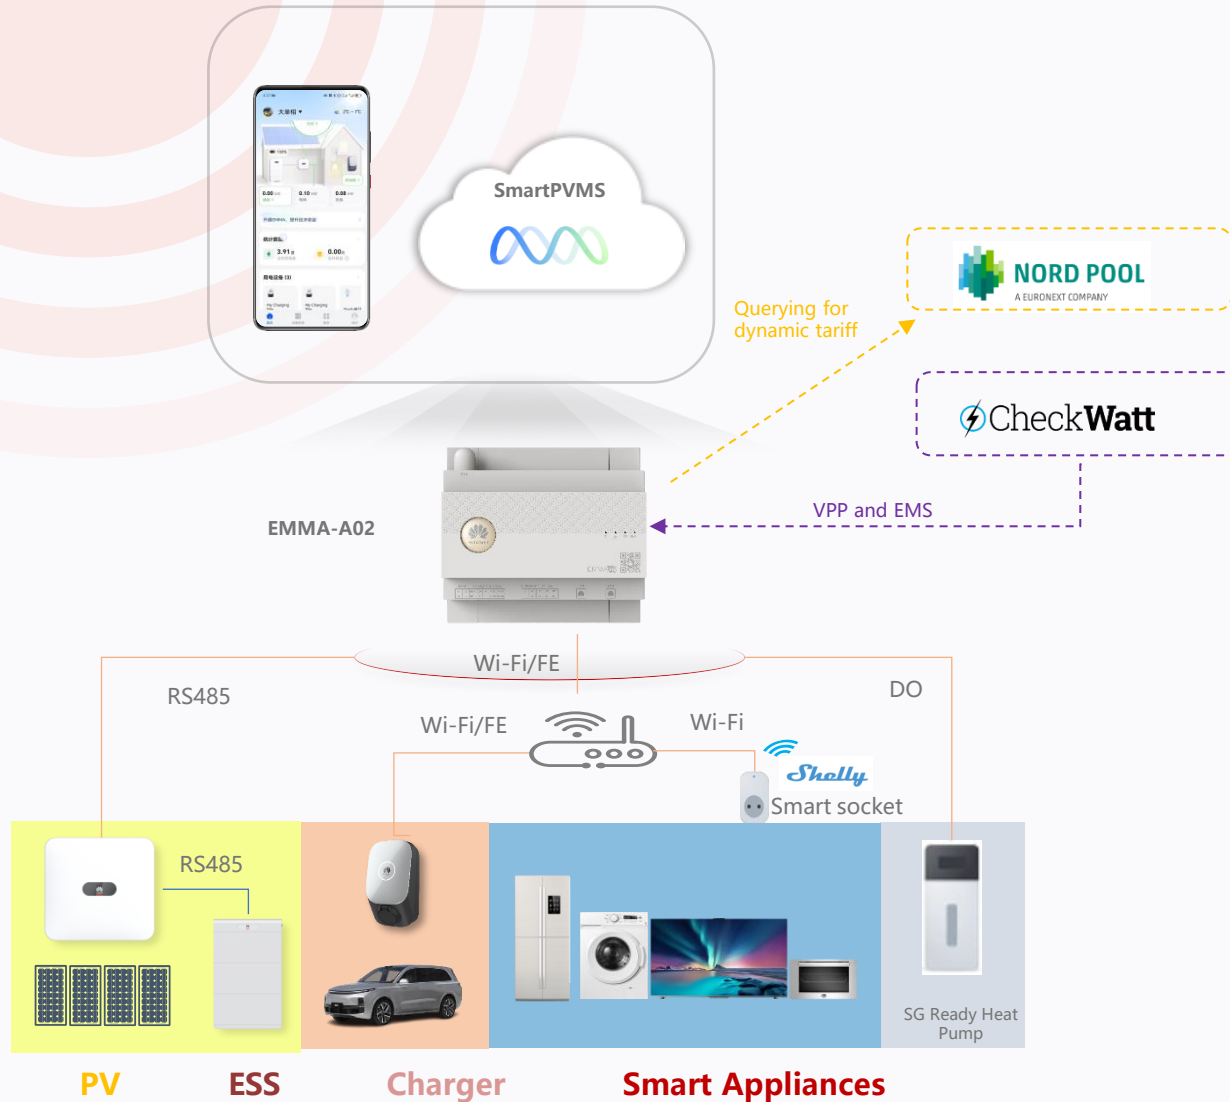

## Smart EMS: Cloud-Edge collaboration, PV+ESS convergence, scheduling policy optimized hourly

### Solution Advantage

- **Higher revenue:** The revenue in dynamic electricity price scenarios increases by 5%~10% on average.
- **Higher accuracy of optical power prediction:** the average prediction accuracy in the next 24H can reach 93% which is 1% higher than the industry.
- **Higher accuracy of load prediction:** the average prediction accuracy in the next 24H can reach 90% which is 2% higher than the industry.
- **Leading architecture:** Cloud-Edge collaboration continuously improves the scheduling algorithm precision.

# EMMA: A Smart, Open, New Generation Home Energy Management Assistant

## Note:

1. The EMMA solution comprises the EMMA-A02 controller and the FusionSolar SmartPVMS.
2. We highly recommend upgrading the EMMA-A02 controller to the V100R024C00SPC100 version.

## Smart Energy Management

- One-stop management of inverters, ESS, optimizers, chargers and appliances. Device status, power usage, consumption statistics, and real-time App monitoring.
- Home appliances can be flexibly controlled through Shelly sockets, supporting power usage priority sorting and scheduled power usage.
- Supports access to SG Ready standard heat pumps.
- Peak shaving, PV preference, and power limitation at the grid connection point (within 2 seconds).
- Automatic startup and shutdown of Diesel Generator (D.G.). **New**

## Smart Scheduling

- Automatically connect to NordPool power market and obtain dynamic tariff in real time. **New**
- Using big data and machine learning, the system integrates electricity prices, weather, and load for optimized solar and ESS scheduling. This approach enhances price arbitrage, allows for zero-power grid connection during negative prices, and boosts average revenue by 5% to 10% in dynamic pricing scenarios. **Capability enhancement**

## Open to 3<sup>rd</sup> parties

- The controller supports the Modbus-TCP standard protocol, integrates with 3<sup>rd</sup> VPPs, enables FCR-D frequency modulation, and responds to control instructions within 2.5 seconds. **New**
- SmartPVMS offers open REST APIs, enabling integration and management with 3<sup>rd</sup> party smart home systems and virtual power plants (VPPs).
